The screenshot shows the IBM Watson Assistant web interface. At the top, there's a navigation bar with 'IBM Watson Assistant Lite', 'Upgrade', 'Learning center', and user icons. The main heading is 'Welcome to the new Watson Assistant' with a 'Next' button. Below this is a progress bar with four steps: 'Create' (active), 'Personalize', 'Customize', and 'Preview'. The 'Create your first assistant' section includes instructions: 'Let's get your assistant up and running. Name your assistant, add a description, and choose a language. In following steps we'll gather more information, show you basic customizations, and give you a preview of what your assistant will look like.' There are three input fields: 'Assistant name' with the value 'Banking ChatBot', a note 'Your assistant name will be kept internally and not visible to your customers', 'Description (optional)' with the value 'AI BASED DISCOURSE FOR BANKING INDUSTRY' and a character count '39/128', and 'Assistant language'.
